

Amendments to the Abstract

Please amend the Abstract of the Disclosure as follows:

An image forming apparatus includes an image forming ~~means~~ unit for forming an image; a first electrical substrate having an electric circuit for electric power supply to the image forming ~~means~~ unit; a second electrical substrate disposed above the first electrical substrate and having an electric circuit for ~~electric power supply to~~ operating the image forming ~~means~~ unit; an opening formed above the first electrical substrate in fluid communication with ~~an~~ ambient air; and a partition member for partitioning the first electrical substrate and the second electrical substrate and for forming an air flow path from the first electrical substrate to the opening.
